

bt-iSuite

Serious Internet protection with award winning Web monitoring and filtering.

It's 2:00 pm. Do You Know Where Your Internet Users Are?

Today, Internet security is crucial to an organization's daily operations. In addition to protecting networks and reducing bandwidth costs, organizations need to meet increasingly stringent security **compliance regulations**, **protect their employees** from **harmful Web content**, **improve productivity**, and **reduce legal liabilities** resulting from inappropriate (and sometimes unintentional) access. The challenge today is finding a solution that **works seamlessly** in your IT environment, is **easy to customize** to your unique business needs, and is **affordable**.

Fortunately, Burstek offers both preventative and reporting tools to meet both your **business needs** and your **IT requirements** in one easy to use solution: **bt-iSuite**.

Designed specifically for the **Windows** environment, bt-iSuite combines our award winning **bt-WebFilter** and **bt-LogAnalyzer**. Our robust subscription software allows you to **set your own access policies** by department, organization unit, group or individual — to meet your organization's **Acceptable Use Policy**—and for specific **time periods** and **bandwidth quotas**. iSuite also provides outstanding **reporting** capabilities, including access to sites by category, URL, time and frequency—as well as access attempts to blocked sites—all by groups or down to the user level. You can also set up reports to automatically be delivered to managers inboxes. iSuite is also extremely flexibility and scalable, enabling businesses, schools and non-profit organizations large or small to seamlessly turn the Internet into a **powerful, safe tool** for all of their users.

With bt-iSuite protecting your network and employees, your organization will have less things to worry about in the battle against Web based threats.

bt-WebFilter

Designed specifically for Windows, bt-WebFilter eliminates the headaches associated with cross-platform integration. The application is designed to be set up once, and provides great ease in customization. All the processes are automatic, utilizing true **Active Directory**, **Replication of Settings** across multiple servers, **Remote Management**, and **Auto-update**. Burstek's **bt-WebFilter** helps protect your company from the latest Internet threats.

ISA Server's Editors' pick.

bt-LogAnalyzer

Burstek's **bt-LogAnalyzer** offers comprehensive reporting in a concise, browser based format that enables department heads to run their own reports under secure conditions and with exceptional ease.

In addition to custom reporting, Burstek provides a host of out standard reports including:

- Enterprise Summaries
- Management Summaries
- Risk Analysis
- User Audit Detail
- Legal Liability Summaries

bt-LogAnalyzer is ISAserver.org's
Reader's Choice Award Recipient

Industry Solutions

Education—bt-iSuite helps educators meet CIPA compliance while securing school campus and district networks, protecting students, improving staff/faculty productivity and reducing legal liabilities. Burstek's extreme flexibility allows educators to easily customize the software to their unique operational needs. Overcome the challenges of shared workstations and protect your students from innocent (or not so innocent) behavior while enabling productive and effective educational and research use.

Finance—Financial organizations all over the world use bt-iSuite to meet their unique operational needs while securing the sensitive financial records and information. bt-WebFilter helps them prevent the inadvertent outflow of confidential information associated with malicious code writing and spyware while meeting GLBA and SOX compliance. bt-LogAnalyzer delivers real time and automated reporting and monitoring of Internet activity critical to fast paced environments and business managers who need to be in the know.

Healthcare—Healthcare organizations face Web challenges with more intensity and scrutiny because of the sensitive nature of the information they collect and must protect: patient records. bt-iSuite helps them maintain HIPAA compliance by preventing the inadvertent outflow of confidential patient information from malicious spyware and key logging.

bt-iSuite: The Windows & ISA Advantage

The truth is, there are plenty of big brand products at big brand prices, all striving to be the "one-size-fits-all" Internet Security solution. Because it was built for the ground up for Microsoft and ISA environments, bt-iSuite delivers Windows & ISA users many advantages.

- Easy installation
- Ease of use and administration
- No additional consoles, hardware, software or plug-ins are required to manage the entire enterprise
- No agents or additional software are required for automatic replication across multiple servers or locations
- FREE 24/7 Technical Support

About Burstek

Burstek has been providing next generation Internet security solutions since 1997. We worked with both public and private enterprise, large and small, in wide variety of industries and around the globe. Our longevity gives us a unique perspective on how best to address the ever-changing security challenges faced by today's Internet dependent organizations, and how to integrate a tailored solution that will protect your network and your people effectively and affordably.
